2 December 2015

Dear Mr Sparrow

Certsure LLP trading as NICEIC and ELECSA was formed following the formation of a partnership between the Electrical Safety Council and the Electrical Contractors' Association (ECA) in 2013.

The partnership builds upon the 100 plus years of experience of the ECA as a trade association for the electrical installation industry in England and Wales with the technical knowledge of the NICEIC which is the UK's leading voluntary regulatory body for the electrical contracting industry. It has been assessing the electrical competence of electricians for over fifty seven years.

Certsure LLP currently maintains a roll of over 36,000 registered contractors across the spectrum of Competent Persons Scheme, Green Deal, Micro Generation Certification scheme, electrical contractors as well as personnel certification for the gas and plumbing industries.

We provide industry-leading certification services, training, building regulations schemes and products and support to the construction industry and beyond.

Quality is the foundation in everything we do. Our services and products are government recognised and United Kingdom Accreditation Service (UKAS) approved.

As a professional body in the construction sector we recognise:

EAL Level 4 Award in the Design and Verification of Electrical Installations

This qualification is for learners who wish to obtain an understanding of the concepts, processes and practices involved with the design; construction management and the initial verification of electrical installations. The emphasis is on the safe and ergonomic design on an installation which complies with relevant statutes, regulations; industry standards, and sound engineering practices.

We believe that the qualification is of an appropriate size and valuable for learners in order to demonstrate the appropriate skills, knowledge and understanding recognised by employers, however, it does not remove the need for any subsequent training they may require as part of their employment.

The qualification will also allow learners to develop the skills and knowledge they will need to progress onto more specialist qualifications.

We are pleased to confirm that we consent to our name and logo being made publicly available on the SFA and EAL websites confirming our support as outlined above.

Yours sincerely

A handwritten signature in black ink that reads "Alan Wells". The signature is written in a cursive style with a period at the end.
