Only The Best From... WWS

our ref :

Wednesday, 08 October 2014

Dear Mr Clark

Weldability Sif have a heritage dating back to 1925 and the origins of the bronze brazing process. For almost a century, they have innovated in the development of welding products, and have supported the industry with technical assistance and consistent product quality.

Offering a wealth of knowledge and experience, key members of the Weldability Sif management team have represented The Welding Institute in a voluntary capacity on several European Norm working groups, and have been appointed to the National Executive of the Association of Welding Distribution. Furthermore, Weldability Sif are a voluntary member of the HSE Welding Partnership involved in researching and managing the "Respiratory Hazards in the Welding and Cutting Environment".

The qualifications are accredited by Ofqual with clear aims and purpose showing how learners achieve a recognised industry qualification. As a trade body representing the welding industry, we are happy to support in principle the inclusion of the following qualifications for public funding:

Table with 2 columns: Qualification ID and Qualification Name. The row for 60058018 is highlighted in yellow.

We believe these qualifications are of an appropriate size and valuable for learners considering moving into this industry or who may have been unemployed for a period of time. Therefore there is a focus on also proving them with the skills required to apply for a job. It will also allow learners to develop the skills and knowledge they will need to progress into more specialist qualifications.

These qualifications are suitable for learners 16-18 and 19+ and are focused on making a prospective employee work ready; however, it does not remove the need for any subsequent training they may require once they are employed.

Completion of a qualification prepares learners to enter employment in a wide variety of job roles within the industry.

We are pleased to confirm that we consent to our name and logo being made publicly available on the SFA and EAL websites confirming our support as outlined above.

Yours sincerely
