

Level 2 Diploma in PIPEWORK SYSTEMS MECHANICAL ENGINEERING TECHNOLOGY

Qualification Specification

Overview

This qualification has been developed to provide learners with an knowledge and understanding of the practices and processes of pipework systems mechanical engineering. It covers knowledge, understanding and skills that are relevant to a career in mechanical engineering and take a hands-on approach to engineering training.

Typical Job

Pipework Engineer.

Qualification code:	501/1057/3
Level:	2
Credit value:	39
Total qualification time:	390
Guided learning hours:	330
Minimum learning age:	14

Purpose of qualification

The EAL Level 2 Diploma in Pipework Systems Mechanical Engineering Technology is a Vocational Related Qualification (VRQ). It covers the intermediate knowledge, understanding and skills that are required by someone working in the engineering industry. It takes a hands-on approach to intermediate engineering training by providing learners with:

- Knowledge and understanding of a range of engineering competencies.
- Information that will help them make more informed decisions about their career options.
- Personal skills to help them work effectively and achieve their potential.

What does this qualification cover?

This qualification comprises three core mandatory units, which provides learners with knowledge and understanding of the engineering environment, engineering techniques and engineering principles and 3 optional units listed on page 3.

Who is this qualification for?

This qualification is predominantly for learners in full time education who are interested in engineering and would like to gain an intermediate level of knowledge and understanding about pipework systems mechanical engineering. The qualification may also be suitable for learners who are interested in pipework systems mechanical engineering and/or are considering a career change.

This qualification has been specifically designed to offer progression into a higher level of study or a Level 3 Apprenticeship

It is suitable for learners aged:

- 14-16
- 16-18
- 19+

Who supports this qualification?

This qualification is:

- Accredited at Level 2
- Endorsed by a number of post-16 providers as facilitating completion of the knowledge requirements for an Engineering Apprenticeships or a range of post-16 learning programmes at level 2 and 3.

What could this qualification lead to?

Typical job roles include:

Pipework Engineer.

This qualification relates to:

- EAL Level 1 NVQ Certificate in Performing Engineering Operations
- EAL Level 2 NVQ Diploma in Performing Engineering Operations
- EAL Level 2 Certificates and Diplomas in Engineering Technology subjects, such as mechanical, electrical, welding, maintenance, and plumbing
- Further EAL level 2 engineering and manufacturing competence qualifications

Entry requirements

Learners must be at least 14 years old. There are no formal entry requirements for this qualification. However, learners must have the potential to achieve all aspects of the qualification. In particular, learners should be able to demonstrate that they have the minimum levels of literacy and numeracy required to comply with the health and safety aspects of the scheme, the completion of the learning outcomes, and the assessments.

How is the qualification achieved?

The EAL Level 2 Diploma in Pipework Systems Mechanical Engineering Technology will be awarded when the learner has successfully completed:

- Three core mandatory units, comprising an on-screen multiple-choice examination
- Three optional units, comprising Centre marked practical/theory assessments.

What will be assessed?

This qualification is made up of units to which appropriate assessment methods have been applied. The units contain the learning outcomes and the assessment criteria that the learner is to be assessed against.

All learning outcomes within the qualification will be assessed. In order to meet this requirement, it is advised that centres should maintain an assessment and feedback record for each learner. This will detail the evidence evaluated against the learning outcome and the feedback given to the learner. All learner evidence must be available to the EAL External Quality Assurer.

Grading criteria

This qualification is graded pass or refer.

Learners must achieve a Pass in ALL components for the qualification to be awarded. If learners are unsuccessful in one or more of the assessment components then the overall result for the qualification will be 'referred' and a certificate will not be awarded.

Providing learners are successful in ALL assessment components, the learner will achieve a pass in their qualification.

How will it be assessed?

Assessment methods within this qualification include an on-screen multiple choice examination for the mandatory units and a Centre marked practical and theory assessments for pathway mandatory unit and the optional units. Assessment methods have been designed to assess the knowledge, understanding and skills of learners for all units.

The on-screen multiple choice examination is set by EAL and marked by EAL. The internal assessment is set by EAL and marked by members of the delivery team at the Centre.

Where the assessment takes the form of written/short answer or multiple choice question papers, these must be treated as controlled assessments.

All assessment decisions are then subject to internal and external quality assurance.

Structure

This qualification will be obtained by the learner once they have successfully completed the **three mandatory units** and **three optional units** from the units listed below.

The qualification has 39 credits and 330 Guided Learning Hours (GLH) and 390 hours Total Qualification Time (TQT).

Mandatory units:

Unit	Unit title	Credit	GLH	Ofqual Code
QETI/001	Engineering environment awareness	6	60	D/600/1847
QETI/002	Engineering techniques	6	60	H/600/1848
QETI/003	Engineering principles	6	60	K/600/1852

Optional units - All units must be completed:

Unit	Unit title	Credit	GLH	Ofqual Code
QETI/011	Non-fusion thermal joining techniques	7	50	T/600/1868
QETI/025	Pipework fixing, bending and jointing methods	7	50	D/600/2299
QETI/026	Pipework systems	7	50	D/600/2304
