

Level 2 NVQ Certificate in Plant Operations

(Construction)

CONSTR

Qualification Specification

Overview

This qualification has been developed to provide learners with the skills and knowledge to be able to carry out a range of activities related to operating plant and equipment. Delivered in the workplace, it can be undertaken as a stand-alone vocational qualification or as part of an apprenticeship.

Typical Job

This qualification is applicable to a variety of Plant Operations occupations including Plant Operator, Crane Operator and Fork Lift Driver.

Qualification code:	601/7790/1
Level:	2
Total qualification time:	160 hours
Guided learning hours:	Min 54 – Max 144
Credits:	Min 16 – Max 43
Minimum age:	16

Issue 3.0

Purpose of the qualification

The primary purpose of this qualification is to confirm occupational competence in a specific job role and the learner will need to select an appropriate pathway to enable them to achieve the assessment requirements.

Delivered in the workplace (or a setting that replicates the workplace), it can be undertaken as a standalone vocational qualification, or as part of an apprenticeship and can be taken by full-time employees or by school and college students with a work placement or part-time job that enables them to develop the appropriate skills in the workplace.

What does this qualification cover?

This qualification comprises two core mandatory units, which provide learners with an introduction to working in the construction industry with 15 different Pathways.

The Pathways cover a wide range of topics including: Cranes and Specialist Lifting, Fork Lift Trucks, Extracting Plant, Transporting Loads, Work Platforms, Laying and Distributing, Compacting, Processing, Loading and Securing, Road/Rail Attachments, Excavating.

Who is this qualification for?

This qualification is predominantly for learners employed on a construction site or similar where they would be working with plant or machinery such as cranes, lorry loaders, hoists or forklift trucks. The qualification may also be suitable for learners who are interested in a career change.

It is suitable for learners aged:

16-18

19+.

Who supports this qualification?

This qualification is:

- Accredited by Ofqual at Level 2
- Endorsed by a number of post-16 providers as facilitating progression to a range of Engineering Apprenticeships or a range of post-16 learning programmes at level 2 and 3.

What could this qualification lead to?

The EAL Level 2 NVQ Certificate in Plant Operations (Construction) provides a specific focus within the construction industry on Plant operations and the opportunity to gain a recognised skills card.

The qualification also provides progression into the following construction qualifications:

EAL Level 2 Certificate in Supply Chain Operations

EAL Level 3 NVQ in Logistics Operations

EAL Level 3 Certificate in Logistics Operations

EAL Level 3 NVQ Supply Chain Management

EAL Level 3 NVQ Diploma in Business-Improvement Techniques

EAL Level 3 Diploma in Supply Chain Management

Further information about apprenticeships and industry recognised qualifications in the engineering sector can be obtained from the EAL

Entry Requirements

Whilst there are no formal entry requirements, learners must have the potential to achieve the assessment criteria set out in the units.

How is the qualification achieved?

This qualification can be obtained by achieving the 2 mandatory units QPOC2/001 and QPOC2/002 for all pathways (total credit value 5), **PLUS** the minimum credits for each pathway **AND** including mandatory pathway units where applicable..

What will be assessed?

This qualification is made up of both mandatory and optional units to which appropriate assessment methods have been applied. The units contain the learning outcomes and the assessment criteria that the learner is to be assessed against.

How will it be assessed?

Performance evidence must be a combination of:

- outputs of the learner's work, such as items that have been manufactured, installed, maintained, designed, planned or quality assured, and documents produced as part of a work activity together with:
- evidence of the way the learner carried out the activities such as witness testimonies, assessor observations or authenticated learner reports, records or photographs of the work/activity carried out, etc.

Competent performance is more than just carrying out a series of individual set tasks. Many of the units contain statements that require the learner to provide evidence that proves they are capable of combining the various features and techniques. Where this is the case, separate fragments of evidence would not provide this combination of

features and techniques and will not, therefore, be acceptable as demonstrating competent performance.

NVQ Units

This qualification is made up of a number of nationally recognised units which EAL has converted into assessment material called 'assessment routes'. These documents allow both the learner and the assessor to record the progress through the NVQ qualifications. The units contain the performance to be assessed, the knowledge to be assessed and the evidence required from the learner to demonstrate their competence. All units in these qualifications contain the following information:

- qualification and unit title
- unit level
- credit value
- guided learning hours (GLH)
- Total Qualification Time (TQT)
- unit summary
- performance to be assessed and evidenced (assessment criteria)
- knowledge to be assessed and evidenced (knowledge requirements)

Structure

This qualification is obtained by achieving 2 mandatory units QPOC2/001 and QPOC2/002 for all pathways (total credit value 5), **PLUS** the minimum credits for each pathway to achieve the minimum credit value for the qualification of 16 AND including any mandatory pathway units where applicable.

Mandatory units: (to be completed for each pathway)
